

JAY RAVAL

Transformation Analyst | Industrial Engineer | Lean Six Sigma Green Belt

Halifax, NS • +1 782 882 2694 • jay.raval@dal.ca • linkedin.com/in/jayr28

PROFESSIONAL SUMMARY

Transformation Analyst and Industrial Engineer (M.Eng., Lean Six Sigma Green Belt) who converts manual operations into automated, data-driven systems. Sole owner of a three-branch operations platform at Prime Material Handling (7 Power Apps, 18 Power Automate flows and 6 Power BI dashboards) spanning process mapping, solution build, governance, training and change management. Track record of measurable efficiency gains, including a 77% to 90% quality-rate improvement and +61% profit in a Lean DMAIC project, and +18% raw-material utilization through KPI-driven planning.

SKILLS & CERTIFICATIONS

- **Transformation & Lean:** Lean Six Sigma (Green Belt), DMAIC, Value Stream Mapping, Root Cause Analysis, Process Mapping (Visio), Change Management, S&OP, Continuous Improvement
- **Data & Analytics:** Power BI, SQL, Python, R, Advanced Excel (Power Query, VBA, Solver), Tableau, IBM Cognos, KPI Reporting, Predictive Analytics, Demand Forecasting
- **Platforms & Systems:** Power Apps, Power Automate, SharePoint (site owner), SAP ERP (MM/TM/ECC), Oracle NetSuite, Lovable, Supabase, GitHub, MS Project, Primavera P6
- **Certifications:** Lean Six Sigma Green Belt • ISO 9001:2015 Lead Auditor • Power BI for Data Analysts (Microsoft) • Quality Management Foundations • MySQL Essential Training • PMP (in progress)

PROFESSIONAL EXPERIENCE

Transformation Analyst • Prime Material Handling, Halifax, NS

Jun 2025 – Present

- Sole transformation analyst for three branches (Dartmouth, Moncton, Saint John); built and own an operations platform of **7 Power Apps, 18 Power Automate flows and 6 Power BI dashboards** on a SharePoint backbone.
- Own platform governance end-to-end (user access, permissions, licensing, technician onboarding) and act as **first responder** across all apps, flows and dashboards.
- Drive adoption through **SOP packs, Visio current/future-state process maps and change management**; key builds detailed under Selected Projects.

Operations Manager & Client Advisor (S&OP) • Aangi Advanced Composites, India

Aug 2022 – May 2023

- Developed Power BI dashboards and Excel tools to visualize operational KPIs: **raw-material utilization +18%, automation rate +12%**, improving supply-chain visibility and planning accuracy.
- Negotiated freight contracts and optimized shipping schedules using Total-Cost-of-Ownership analysis within SAP-supported workflows, improving delivery reliability and reducing logistics spend.
- Aligned procurement schedules with forecasted demand using MRP logic and replenishment models, avoiding stockouts and excess holding costs.

Process Improvement Engineer • Aangi Advanced Composites, India

Oct 2021 – Aug 2022

- Performed root-cause and gap analysis to identify and resolve supply-chain bottlenecks.
- Applied ABC/XYZ classification and lead-time analysis to maintain optimal inventory levels, safety-stock buffers and reorder points.
- Led customs data collection and ERP data entry, ensuring compliance with international shipping regulations.

SELECTED PROJECTS

Part Request System • Prime Material Handling

Live

- **Mapped, designed, built and implemented** the end-to-end parts workflow: canvas apps with automated notifications, timestamps and sync, plus shop-floor displays, replacing manual tracking with real-time visibility.

Dispatch System • Prime Material Handling

Built

- **Mapped, designed and built** field-service dispatch (customer list, machine history, dispatch log) on Lovable, Supabase and GitHub.

PSSR Sales Pipeline & Dashboard	· Prime Material Handling	Live
Rebuilt the sales funnel list from the ground up; delivered a self-refreshing Power BI dashboard (incl. Dock & Door), giving live pipeline visibility with zero manual updates.		
SOP Library & Process Documentation	· Prime Material Handling	Live
Authored and maintain the full SOP pack and Visio process maps, the change-management layer driving adoption of every tool.		
ERP System: AI-Assisted Build	· Prime Material Handling	In Progress
Architecting a custom ERP on Lovable, GitHub and Supabase, pairing AI-assisted development with the Microsoft environment.		
Paper Boat Production Optimization (DMAIC)	· Dalhousie University	2024
Lean DMAIC project (5S, PDCA, Poka-Yoke, VSM) improved quality rate from 77% to 90% and increased total profit by 61%.		
Appointment Scheduling Optimization	· Nova Scotia Health initiative	2025
Addressed appointment no-show rates of up to 30% by pairing data-driven insight with people-centered change management.		
Selective Maintenance Planning: Vehicle Reliability	· Dalhousie University	2024
Built Weibull / k-out-of-n reliability models with Python and Excel optimization to maximize readiness under time and budget constraints.		

EDUCATION

Master of Engineering, Industrial Engineering	· Dalhousie University, Halifax, NS	2023 - 2025
MBA, Business Management (in progress)	· NMIMS	2025 - 2027
Bachelor of Engineering, Mechanical (Rank 151 of 31,163)	· Gujarat Technological University, India	2017 - 2021

VOLUNTEERING

Event Volunteer	· SailGP Canada, Halifax, NS	2026
Volunteer of Administration	· PMI Nova Scotia Chapter	Aug 2024 - Jul 2025
